DALY WEST HAS ISSUED REPORT

Results of Year Were Better Than Had Been Expected by Officials.

CASH SURPLUS IS

MUCH INCREASED

Enough Mill Ore Developed at Depth to Run Plant Dur-

ing Year.

At the time of the Daly West annual meeting a few weeks ago the financial affairs of the company were entered into thoroughly, so the good condition disclosed by the annual report, which was received Wednesday by stockholders, was nothing new. nothing new.

that the company ended the year with \$194,129.29 cash on hand, after paying \$162,000 in dividends during the period. \$16,000 in dividends during the period. This cash compares favorably with that on hand a year ago, when the surplus was \$117,880.16. The ore rates for the year were as follows: Concentrates, 16,122 tons, value \$576,122.07; zinc concentrates, 7819 tons, value \$111,293.59; crude ore, 4365 tons, value \$94,49.21. The miscellaneous receipts were \$12,111.12.

Ore Developed. Regarding mine conditions Superintendent E. L. Tabot states that from his moveledge of the mine he estimates there is enough ore developed on the 1700, 1800 and 1800 levels to supply the mill during 1911 at the rate of production made in 1910. Former General Manager Ernest Bam-

Former General Manager Ernest Bamberger reports as follows:

"Dividends amounting to \$162,000 have been paid, and the cash balance has been increased \$76,249,15, production having been much larger than during the invitions year. The operations for the year 1969 showed a loss of \$21,604,63, while for the year 1910 a profit of \$238, 249,13 is shown.

Developments during the first quarter of the year continued to prove favorable, but up to the present less hopeful; however, indications exist which encourage the prosecution of development work at several points in the lower workings of the nime, which warrant the expectation of much better results. Stopes started in the large ore body on the 1700-1001 level, referred to in the last annual report, showed the ore to be less in exist and value than the previous development had indicated, and as this level was extended westerly results were unsatisfactory.

Results at Depth.

Results at Depth.

Results at Depth.

The ore shoots on the 1800 and 1900 foot levels have been found to be less continuous than above. A large portion of the vein on the 1700 and 1900 foot levels has been prospected and so far impredictive. A raise from the 1550-foot level, near the Baly-Judge line, is looking well and will open up a block of ground heretofore unprospected. The 113-foot drift west has been run in the freezall and a crossout will be driven to the vein when the heading is advanced some distance.

to the cent when the heading is advanced some distance.

"In September, when production was curtailed and the mill run but one shift, if was enticipated that under these conditions operating expenses might not be one. This, however, has not been proven to be the case, as good earnings have been made, due in part to revenue derived from the leasers.

While developments for the year, as stated above, have been unfavorable. New I have been a considerable amount of territory now being prospected, upon which the future of the mine depends in a large measure."

If A.Y. D.

MAY DAY OFFICIALS INCREASE THE FORCE

The operating force of the May Day company will be increased in the immediate future, and greater emphasis laid upon both development work and orc extraction for shipments. Three shifts will

be employed, and the fur should be flying in an unusually brisk manner by the end of the week.

There seems to have been some mistake regarding the discovery of the May Day ore body. It was thought at first hat the drift had found ore on the 500 level, but it was a ruise from the 500 Utah Converted that brought the results. The management is now drifting to where this ore should confect with the 500, and this will extend the possibilities of the discovery to a most significant extent.

Means to Try for Record.

SAN ANTONIO Tex. March 15.— Lieutenant E. A. Honeywell of St. Louis. Leutenant E. A. Honeywell of St. Louis, Mo., who conducted several cross country balloen trips from here early in the winter, contemplates a try for the world's long distance record from San Antonio. He writes he will arrive in the city not later than April 1. He is now in St. Louis and when he comes he will have a new bulloon. He says that the start will be made from this city some time in April after the winter has been broken and the possibility of snow has decreas d.

The representative of a European house dealing exclusively in the sale of securities of high class mining com-panies will be in the city for a few days and wishes to meet mine owners who have high class propositions. Address C. W. E., Knutsford hotel, giving full particulars.

WILLIAMS' KIDNEY PILLS

KING WILLIAM NOW NEARING THE ORE

Present Showing Is the Best Ever Met With in the Property ..

"Ore should make its appearance a any round of shots," was the report that came from Eureka on Wednesday re garding the King William property. General Manager Blanchard reached Salt Lake yesterday morning for the purpose of attending the Shriners' doings, and when informed of this report by The Tribune he stated that conditions were

more favorable at the moment than ever before.

"We are following the contact along our 1900-foot level," he said, "and everything certainly looks extremely encouraging. The ground is loosening up nicely."

It is sufficient in this connection to say HIGHER PRICED STOCKS MONOPOLIZE ATTENTION

The higher priced issues on exchange Wednesday came in for the lion's share of attention, and although only \$7.954 shares of stock sold during the day, the market value was \$29.119.30.

Victoria and Iron Blossom maintain their leadership, allhough the former slipped back yesterday toward the close. It was a highly satisfactory day all round.

The following were the closing unlisted and listed stock transactions:

Dynamite Outrage.

PHILADELPHIA, March 15.—A dwelling in the Italian section of the city was partly wrecked today by dynamite. The dwelling was occupied by Antonio Rossi, a prosperous merchant, his wife and five children. Rossi has received the customary "black hand" letters demanding money, Joseph Bucesorine, 30 years old, was caught running away from the scone of the explosion and was arrested.

WEALTH OF TH

Enormous Addition to N Known Resources in Par Four Years.

UTAH THE LEADER IN THE INDUST

Figures of Tonnage and Values Run Beyond An Previous Conception,

It is not sufficiently appreciated the porphyry copper propositions not only revolutionized the red most dustry during the past three year they have added enformously to wealth of the country. Beginning the Utah Copper company and mon through the Nevada Consolidated, Chino, Mismi, Inspi and several others just entering the light, one comes to an amount of core which is fairly staggering in its mensity.

light, one comes to an amount of core which is fairly staggering in a mensity.

It is figured, and figured constituely, that these various properties contain a total of 400,000,000 tons of the average copper contents of which the series of the average copper contents of which the series of the average copper contents of the average copper market, this metal in net valuation of \$1,250,000,000,000,000,000,000 to 123-cent copper market, this metal in net valuation of \$1,250,000,000,000,000,000 for the gold and silver centent the tonnage.

This wealth, added to the known sources of the country within the four years just passed, and Utah ont in any degree take chough credit satisfaction from the fact that in Utah Copper property of Blindam conceived the great perphyry industriation. The hear element points of the country.

It is this tonnage which has made world timid and touchy on the costituation, the hear element points the ore as one argument why the should remain cheap and abundant domestic consumption and expert copper during 1910 totaled 1,41,45 pounds, and with the same rate uping in the future, there are about years supply of copper in this encountry and such that 1910 was a normal for either consumption or experts, as general business conditions were possible and the same contents of the consumption or experts, as general business conditions were possible and the consumption of experts, as general business conditions were possible and the consumption of experts, as general business conditions were possible and the consumption of experts, as general business conditions were possible and the consumption of experts, as general business conditions were possible and the consumption of experts, as general business conditions were possible will admit that 1910 was a norm for either consumption or experts, general business conditions were all favorable for the metals. Had it not been for the popply; their promise of metal supply, under the old conditions, wond been so scarce that its price today have been prohibitive in allow utilization for the purposes to above all metals. It is adapted.

The articles of incorporation of the Consolidated-United Tintic Mines company were filed Wednesday with the county clerk, this being the company which hereafter will own and operate the cld Bullock. Tintle Empire and Tintic Combination properties of the Tintic district. The special stockholders meetings were held during the first of the month, and all the legal steps taken to perfect the deal.

The capitalization of the company is \$1,000,000 divided into 2,000,000 shares of stock, par value 50 cents each. B. H. Bullock is president; S. S. Pond is vice president; I. J. Filzgerald is secretary and treasurer. Joseph L. Bullock and I. A. Smoot complete the board of directors. It is understood that the officials plan a comprehensive campaign of development work, the property being located in the eastern end of the district.
